

## **Kenmoor Middle School Construction Update Meeting | May 4, 2023 Questions & Answers**

### **How many classrooms are there?**

There are approximately 12-15 per wing not including specialty rooms. The school's capacity is 1,200.

### **What security/building design has been put in place in case of a school shooting?**

There are several security features in place. The full campus will be encased in fencing. When the building is in session for the day, the only way to get into the building is a secure vestibule. A person will not be able to enter the building without passing through the administrative suite. Additionally, the security office will be positioned so that all visitors will need to pass by it. There are cameras positioned around the interior and exterior. Each room has a one-touch lock system that locks down the classroom and can only be unlocked with a key. There will be shades to draw over the windows (interior and exterior).

### **Will there be a soccer field?**

Yes, there will be a soccer and multipurpose field.

### **How many Sensory/Calming Rooms (designated spaces) are there?**

The space is built to reflect the programming as designated by Special Education. All the required spaces are there. Additionally, some spaces have the ability to become sensory spaces so there is some flexibility.

### **Is there still a designated Autism space?**

The space is built to reflect the programming as designated by Special Education. All the required spaces are there.

### **Will some students be able to see the inside of the school early (before the start of the school year 2023-24)?**

School leadership would make that decision. Leadership and administration will have access to the building early. Turnover is expected by July 15th.

### **Are there more pictures of the inside of the school?**

The program will note this request and add additional photos for future presentations.
